"4Q" 2007 Master Catalog Pricelist
Effective date: November 1, 2007 – January 31, 2008

The *Master Catalog Pricelist* communicates the prices of our product and services family to the field worldwide. The below is a *summary* of the areas which have changed. **You are strongly encouraged to review the price sheet for any other changes that may affect localized versions of the price list.** If you have any questions regarding this Price List or other pricing issues, please contact ISS pricing at isspricing@iss.net.

	Added/Modified	Removed
Proventia Network IPS/IDS Systems	Added GX5008SPF and GX5108SPF	No changes
Proventia Multi-Function Security	Added MX3006W and MX1004W	No changes
Proventia Anomaly Detection System	No changes	No changes
Proventia Enterprise Scanner	Added ES750	No changes
Internet Scanner	No changes	No changes
Desktop Protection		
Server Protection	No changes	No changes
Proventia Network Mail Security	Added MSL-L and MS1002-VM	No removals
Proventia Web and Mail Filter	No changes	No changes
RealSecure for Crossbeam	No changes	No changes
Proventia Management Tools including SiteProtector and 3rd party tools	No changes	No changes
Managed Security Services	Added ITC Email Security Codes, Web Security Codes and Email/Web Security Codes.	No changes
Professional Services	No changes	No changes
Education	No changes	No changes
Pricing for Managed Security Service Providers	No changes	No changes
Tiered Support	No changes	No changes
Shipping Fees	No changes	No changes
Appliance Accessories	No changes	No changes

Notes

- Please refer to the Notes section after each product family section for information about ordering.
- There are products on the price list which are not Generally Available at the date of publication, but are scheduled to be released. Please refer to the Product Availability Matrix on the ISS Intranet for details on release dates and availability.
- Unless an item is on a published price list, it may not be presented to a customer for quoting purposes.
- Occasionally addendums to this price sheet are issued and an announcement will go out to the field it an addendum is issued. Please check periodically on the Sale Zone at the ISS intranet for price sheet addendums and updates.
- Specialized price sheets are available for current promotions, for our certified resellers and partners, and for ROHS compliant products. Please contact isspricing@iss.net for request information about these offerings.

Proventia® Network IPS/IDS Systems

Proventia GX3002-C

Product Code	Descriptions	Performance Rating	Protected Interfaces	Form Factor	List Price:
GX3002-C-1-P	Proventia Network IPS GX3002-C (Fail Open, 2 TX-Copper Protected Interfaces)	10Mbps	2	Desktop	**$4,295.00**
GX3002-C-1-M	Tech Support, Advance Exchange, and Updates for Proventia GX3002-C				**$945.00**
GX3002-C-1-HS	GX3002-C Spare Appliance				**$2,147.50**
GX3002-C-L-P	GX3002-C Spare License Only for upgrade spare to production - full maintenance required				**$2,147.50**

Proventia GX4002-C

Product Code	Descriptions	Performance Rating	Protected Interfaces	Form Factor	List Price:
GX4002-C-1-P	Proventia Network IPS GX4002-C (Fail Open, 2 TX-Copper Protected Interfaces)	200Mbps	2	1U	**$10,995.00**
GX4002-C-1-M	Tech Support, Advanced Exchange, and Updates for Proventia GX4002-C				**$2,419.00**
GX4002-C-1-HS	GX4002-C Spare Appliance				**$5,498.00**
GX4002-C-L-P	GX4002-C Spare License Only for upgrade spare to production - full maintenance required				**$5,498.00**

Proventia GX4004-C

Product Code	Descriptions	Performance Rating	Protected Interfaces	Form Factor	List Price:
GX4004-C-1-P	Proventia Network IPS GX4004-C (Fail Open, 4 TX-Copper Protected Interfaces)	200 Mbps	4	1U	**$15,995.00**
GX4004-C-1-M	Tech Support, Advanced Exchange, and Updates for Proventia GX4004-C				**$3,519.00**
GX4004-C-1-HS	GX4004-C Spare Appliance				**$7,998.00**
GX4004-C-L-P	GX4004-C Proventia GX4004-C Intrusion Detection Appliance - Spare License Only for upgrade spare to production - full maintenance required				**$7,998.00**

Proventia GX5008-C

Product Code	Descriptions	Performance Rating	Protected Interfaces	Form Factor	List Price:
GX5008SFP	(ROHS) Proventia GX5008SPF Intrusion Prevention Appliance				**$39,995.00**
GX5008SFP-M	Tech Support, Advanced Exchange, and Updates for upgrade to Proventia GX5008SFP				**$8,799.00**
GX5008-C-1-P	Proventia Network IPS GX5008-C (Fail Closed, 8 TX-Copper Protected Interfaces)	400Mbps	8	2U	**$37,995.00**
	If customers wish to purchase External Bypass units, they are available in the appliance selection. See Price list section 'Proventia IPS Bypass Units and Accessories' for ordering information.				
GX5008-C-1-M	Tech Support, Advanced Exchange, and Updates for Proventia GX5008-C				**$8,359.00**

Proventia® Network IPS/IDS Systems

Proventia GX5008-C

GX5008-CHA-1-P	Proventia Network IPS GX5008-C High Availability Model High Availability System requires a standard box and an HA box + maintenance:	**$24,697.00**
GX5008-CHA-1-M	Tech Support, Advanced Exchange, and Updates for Proventia GX5008-C HA High Availability System requires a standard box and an HA box + maintenance:	**$5,433.00**
GX5008-C-1-HS	GX5008-C Spare Appliance	**$18,998.00**
GX5008-C-L-P	GX5008-C Spare License Only for upgrade spare to production - full maintenance required	**$18,998.00**

Proventia GX5008-CF

Product Code	Descriptions	Performance Rating	Protected Interfaces	Form Factor	List Price:
GX5008-CF-1-P	Proventia Network IPS GX5008-CF (Fail Closed, 4 TX-Copper Ports / 4 SFP Interfaces) Appliance Price includes price of the 2 transceiver kits. Customer must choose 2 transceiver kits to populate the configurable connectors. -DUAL-TVR-KIT-TX-ROHS (copper) -DUAL-TVR-KIT-SX-ROHS (fiber) -DUAL-TVR-KIT-LX-ROHS (fiber) External Bypass units are available in the appliance accessory selection. See Price list section 'Proventia IPS Bypass Units and Accessories' for ordering information.	400Mbps	8	2U	**$38,995.00**
GX5008-CF-1-M	Tech Support, Advanced Exchange, and Updates for Proventia GX5008-CF				**$8,579.00**
GX5008-CFHA-1-P	Proventia Network IPS GX5008-CF High Availability Model Appliance Price includes price of the 2 transceiver kits. Customer must choose 2 transceiver kits to populate the configurable connectors. -DUAL-TVR-KIT-TX-ROHS (copper) -DUAL-TVR-KIT-SX-ROHS (fiber) -DUAL-TVR-KIT-LX-ROHS (fiber) External Bypass units are available in the appliance accessory selection. See Price list section 'Proventia IPS Bypass Units and Accessories' for ordering information.				**$25,347.00**
GX5008-CFHA-1-M	Tech Support, Advanced Exchange, and Updates for Proventia GX5008-CF HA				**$5,576.00**
GX5008-CF-1-HS	GX5008-CF Spare Appliance Appliance Price includes price of the 2 transceiver kits. Customer must choose 2 transceiver kits to populate the configurable connectors. -DUAL-TVR-KIT-TX-ROHS (copper) -DUAL-TVR-KIT-SX-ROHS (fiber) -DUAL-TVR-KIT-LX-ROHS (fiber)				**$19,498.00**
GX5008-CF-L-P	GX5008-CF Spare License Only for upgrade spare to production - full maintenance required				**$19,498.00**

Proventia G400

Product Code	Descriptions	Performance Rating	Protected Interfaces	Form Factor	List Price:
G400-1-PB	Proventia G400 Intrusion Prevention Appliance	400 Mbps	8 Copper	2U	**$36,995.00**
G400-1-CSB	Tech Support, Advanced Exchange, and Updates for Proventia G400				**$8,139.00**
G400HA-1-PB	Proventia G400 Intrusion Prevention Appliance - High Availability Model				**$24,047.00**
G400HA-1-CSB	Tech Support, Advanced Exchange, and Updates for Proventia G400 High Availability Model				**$5,290.34**

Proventia® Network IPS/IDS Systems

Proventia G400

G400-1-HS	Proventia G400 hardware for cold spare only	**$18,498.00**
G400-L-PB	Proventia Intrusion Detection Appliance G400 - Spare License Only for upgrade spare to production - full maintenance required	**$18,498.00**

Proventia G400F

Product Code	Descriptions	Performance Rating	Protected Interfaces	Form Factor	List Price:
G400F-1-PB	Proventia G400F Intrusion Prevention Appliance	400 Mbps	8 Fiber	2U	**$38,995.00**
G400F-1-CSB	Tech Support, Advanced Exchange, and Updates for Proventia G400F				**$8,579.00**
G400FHA-1-PB	Proventia G400F Intrusion Prevention Appliance - High Availability Model				**$25,347.00**
G400FHA-1-CSB	Tech Support, Advanced Exchange, and Updates for Proventia G400F- Intrusion Prevention Appliance - HA model				**$5,576.34**
G400F-1-HS	Proventia G400F hardware for cold spare only				**$19,498.00**
G400F-L-PB	Proventia Intrusion Detection Appliance G400F - Spare License Only for upgrade spare to production - full maintenance required				**$19,498.00**
GEFB2-1-H	Dual Fiber Bypass Unit (2 segment) for G series of appliances				**$3,990.00**
GEFB2-1-CS	Dual Fiber Bypass Unit (2 segment) Maintenance for GEFB2-1-H				**$400.00**

Proventia G400CF

Product Code	Descriptions	Performance Rating	Protected Interfaces	Form Factor	List Price:
G400CF-1-PB	Proventia G400CF Intrusion Prevention Appliance	400 Mbps	4 Copper /4 Fiber	2U	**$37,995.00**
G400CF-1-CSB	Tech Support, Advanced Exchange, and Updates for Proventia G400CF				**$8,359.00**
G400CFHA-1-PB	Proventia G400CF Intrusion Prevention Appliance - High Availability Model				**$24,697.00**
G400CFHA-1-CSB	Tech Support, Advanced Exchange, and Updates for Proventia G400CF- Intrusion Prevention Appliance - High Availability Model				**$5,433.00**
G400CF-1-HS	Proventia G400CF hardware for cold spare only				**$18,998.00**
G400CF-L-PB	Proventia Intrusion Detection Appliance F400CF - Spare License Only for upgrade spare to production - full maintenance required				**$18,998.00**
GEFB2-1-H	Dual Fiber Bypass Unit (2 segment) for G series of appliances				**$3,990.00**
GEFB2-1-CS	Dual Fiber Bypass Unit (2 segment) Maintenance for GEFB2-1-H				**$400.00**

Proventia GX5108-C

Product Code	Descriptions	Performance Rating	Protected Interfaces	Form Factor	List Price:
GX5108SFP	(ROHS) Proventia GX5108SFP Intrusion Prevention Appliance				**$59,995.00**
GX5108SFP-M	Tech Support, Advanced Exchange, and Updates for Proventia GX5108SFP				**$13,199.00**
GX5108-C-1-P	Proventia Network IPS GX5108-C (Fail Closed, 8 TX-Copper Protected Interfaces)	1.2Gbps	8	2U	**$57,995.00**
	External Bypass units are available in the appliance accessory selection. See Price list section 'Proventia IPS Bypass Units and Accessories' for ordering information.				
GX5108-C-1-M	Tech Support, Advanced Exchange, and Updates for Proventia GX5108-C				**$12,759.00**
GX5108-CHA-1-P	Proventia Network IPS GX5108-C High Availability Model				**$37,697.00**
	High Availability System requires a standard box and an HA box + maintenance:				
GX5108-CHA-1-M	Tech Support, Advanced Exchange, and Updates for Proventia GX5108-C HA				**$8,293.00**
	High Availability System requires a standard box and an HA box + maintenance:				

Proventia® Network IPS/IDS Systems

Proventia GX5108-C

GX5108-C-1-HS	GX5108-C Spare Appliance	**$28,998.00**
GX5108-C-L-P	GX5108-C Spare License Only for upgrade spare to production - full maintenance required	**$28,998.00**

Proventia GX5108-CF

Product Code	Descriptions	Performance Rating	Protected Interfaces	Form Factor	List Price:
GX5108-CF-1-P	Proventia Network IPS GX5108-CF (Fail Closed, 4 TX-Copper Ports / 4 SFP Interfaces) Appliance Price includes price of the 2 transceiver kits. Customer must choose 2 transceiver kits to populate the configurable connectors. -DUAL-TVR-KIT-TX-ROHS (copper) -DUAL-TVR-KIT-SX-ROHS (fiber) -DUAL-TVR-KIT-LX-ROHS (fiber) External Bypass units are available in the appliance accessory selection. See Price list section 'Proventia IPS Bypass Units and Accessories' for ordering information.	1.2Gbps	8	2U	**$58,995.00**
GX5108-CF-1-M	Tech Support, Advanced Exchange, and Updates for Proventia GX5108-CF				**$12,979.00**
GX5108-CFHA-1-P	Proventia Network IPS GX5108-CF High Availability Model Appliance Price includes price of the 2 transceiver kits. Customer must choose 2 transceiver kits to populate the configurable connectors. -DUAL-TVR-KIT-TX-ROHS (copper) -DUAL-TVR-KIT-SX-ROHS (fiber) -DUAL-TVR-KIT-LX-ROHS (fiber) External Bypass units are available in the appliance accessory selection. See Price list section 'Proventia IPS Bypass Units and Accessories' for ordering information.				**$38,347.00**
GX5108-CFHA-1-M	Tech Support, Advanced Exchange, and Updates for Proventia GX5108-CF HA				**$8,436.00**
GX5108-CF-1-HS	GX5108-CF Spare Appliance Appliance Price includes price of the 2 transceiver kits. Customer must choose 2 transceiver kits to populate the configurable connectors. -DUAL-TVR-KIT-TX-ROHS (copper) -DUAL-TVR-KIT-SX-ROHS (fiber) -DUAL-TVR-KIT-LX-ROHS (fiber)				**$29,498.00**
GX5108-CF-L-P	GX5108-CF Spare License Only for upgrade spare to production - full maintenance required				**$29,498.00**

Proventia GX6116SFP

Product Code	Descriptions	Performance Rating	Protected Interfaces	Form Factor	List Price:
GX6116SFP	Proventia Network IPS GX6116SFP 15 Gbps throughput (16 SFP Interfaces) Appliance Price includes onsite Set-up assistance team (SAT) and 5-day professional services. Price includes price of the 8 transceiver kits. Customer must choose 8 transceiver kits to populate the configurable connectors. -DUAL-TVR-KIT-TX-ROHS (copper) -DUAL-TVR-KIT-SX-ROHS (fiber) -DUAL-TVR-KIT- LX-ROHS (fiber) External Bypass units are available in the appliance accessory selection. See Price list section 'Proventia IPS Bypass Units and Accessories' for ordering information.	15 Gbps			**$188,995.00**

Proventia® Network IPS/IDS Systems

Proventia GX6116SFP

GX6116SFP-M	Tech Support, Advanced Exchange, and Updates for Proventia GX6116SFP	15 Gbps	**$41,579.00**
GX6116SFP-HA	Proventia Network IPS GX6116SFP (16 SFP Interfaces) High Availability Appliance Appliance Price includes onsite Set-up assistance team (SAT) and 5-day professional services. Price includes price of the 8 transceiver kits. Customer must choose 8 transceiver kits to populate the configurable connectors. -DUAL-TVR-KIT-TX-ROHS (copper) -DUAL-TVR-KIT-SX-ROHS (fiber) -DUAL-TVR-KIT- LX-ROHS (fiber) External Bypass units are available in the appliance accessory selection. See Price list section 'Proventia IPS Bypass Units and Accessories' for ordering information.	15 Gbps	**$122,847.00**
GX6116SFP-HA-M	Tech Support, Advanced Exchange, and Updates for upgrades to Proventia GX6116SFP-HA	15 Gbps	**$27,027.00**
GX6116SFP-SPARE	Spare appliance for GX6116SFP Appliance Price includes onsite Set-up assistance team (SAT) and 5-day professional services. Price includes price of the 8 transceiver kits. Customer must choose 8 transceiver kits to populate the configurable connectors. -DUAL-TVR-KIT-TX-ROHS (copper) -DUAL-TVR-KIT-SX-ROHS (fiber) -DUAL-TVR-KIT- LX-ROHS (fiber) External Bypass units are available in the appliance accessory selection. See Price list section 'Proventia IPS Bypass Units and Accessories' for ordering information.	15 Gbps	**$94,498.00**
GX6116SFP-L	GX6116SFP Spare License Only for upgrade spare to production - full maintenance required	15 Gbps	**$94,498.00**

Proventia G2000

Product Code	Descriptions	Performance Rating	Protected Interfaces	Form Factor	List Price:
G2000-1-PB	Proventia G2000 Intrusion Prevention Appliance	2 Gbps	8 Copper	2U	**$95,995.00**
G2000-1-CSB	Tech Support, Advanced Exchange, and Updates for Proventia G2000				**$21,119.00**
G2000HA-1-PB	Proventia G2000 Intrusion Prevention Appliance - High Availability Model				**$62,397.00**
G2000HA-1-CSB	Tech Support, Advanced Exchange, and Updates for Proventia G2000 - High Availability Model				**$13,727.00**
G2000-1-HS	Proventia G2000 hardware for cold spare only				**$47,998.00**
G2000-L-PB	Proventia Intrusion Detection Appliance G2000 - Spare License Only for upgrade spare to production - full maintenance required				**$47,998.00**

Proventia G2000F

Product Code	Descriptions	Performance Rating	Protected Interfaces	Form Factor	List Price:
G2000F-1-PB	Proventia G2000F Intrusion Prevention Appliance	2 Gbps	8 Fiber	2U	**$99,995.00**
G2000F-1-CSB	Tech Support, Advanced Exchange, and Updates for Proventia G2000F				**$21,999.00**
G2000FHA-1-PB	Proventia G2000F - Intrusion Prevention Appliance-High Availability Model				**$64,997.00**
G2000FHA-1-CSB	Tech Support, Advanced Exchange, and Updates for Proventia G2000F - High Availability Model				**$14,299.00**
G2000F-1-HS	Proventia G2000F hardware for cold spare only				**$49,998.00**
G2000F-L-PB	Proventia Intrusion Detection Appliance G2000F Spare License Only for upgrade spare to production - full maintenance required				**$49,998.00**

Proventia® Network IPS/IDS Systems

Proventia G2000F

GEFB2-1-H	Dual Fiber Bypass Unit (2 segment) for G series of appliances	**$3,990.00**
GEFB2-1-CS	Dual Fiber Bypass Unit (2 segment) Maintenance for GEFB2-1-H	**$400.00**

Proventia G2000CF

Product Code	Descriptions	Performance Rating	Protected Interfaces	Form Factor	List Price:
G2000CF-1-PB	Proventia G2000CF (copper / fiber) Intrusion Prevention Appliance	2 Gbps	4 Copper /4 Fiber	2U	**$97,995.00**
G2000CF-1-CSB	Tech Support, Advanced Exchange, and Updates for Proventia G2000CF				**$21,558.00**
G2000CFHA-1-PB	Proventia G2000CF (copper / fiber)- Intrusion Prevention Appliance - High Availability Model				**$63,397.00**
G2000CFHA-1-CSB	Tech Support, Advanced Exchange, and Content Subscription for Proventia G2000CF - High Availability Model				**$13,947.00**
G2000CF-1-HS	Proventia G2000CF hardware for cold spare only				**$48,998.00**
G2000CF-L-PB	Proventia Intrusion Detection Appliance G2000CF - Spare License Only for upgrade spare to production - full maintenance required				**$48,998.00**
GEFB2-1-H	Dual Fiber Bypass Unit (2 segment) for G series of appliances				**$3,990.00**
GEFB2-1-CS	Dual Fiber Bypass Unit (2 segment) Maintenance for GEFB2-1-H				**$400.00**

Proventia IPS Bypass Units and Accessories

Product Code	Descriptions	List Price:
BYP-4T-0S-0L-P	External Power Failure Bypass Unit for GX series appliances (4 TX-Copper Segments)	**$2,200.00**
BYP-4T-0S-0L-M	Technical Support and Maintenance for External Power Failure Bypass Unit (4 TX-Copper Segments)	**$220.00**
BYP-2T-2S-0L-P	External Power Failure Bypass Unit for GX series appliances(2 TX-Copper Segments / 2 SX-Fiber Segments)	**$4,600.00**
BYP-2T-2S-0L-M	Technical Support and Maintenance for External Power Failure Bypass Unit (2 TX-Copper Segments / 2 SX-Fiber Segments)	**$460.00**
BYP-2T-0S-2L-P	External Power Failure Bypass Unit for GX series appliances(2 TX-Copper Segments / 2 LX-Fiber Segments)	**$6,200.00**
BYP-2T-0S-2L-M	Technical Support and Maintenance for External Power Failure Bypass Unit (2 TX-Copper Segments / 2 LX-Fiber Segments)	**$620.00**
BYP-2T-1S-1L-P	External Power Failure Bypass Unit for GX series appliances (2 TX-Copper Segments / 1 SX-Fiber Segments / 1 LX-Fiber Segments)	**$5,400.00**
BYP-2T-1S-1L-M	Technical Support and Maintenance for External Power Failure Bypass Unit (2 TX-Copper Segments / 1 SX-Fiber Segments)	**$540.00**
BYP-0T-0S-4L-P	External Bypass Unit for GX series appliances (4 LX-Fiber Segments)	**$10,889.00**
BYP-0T-0S-4L-M	Tech Support and Advanced Exchange for Bypass Unit (4 LX-Fiber Segments)	**$1,089.00**
BYP-0T-2S-2L-P	External Bypass Unit for GX series appliances (2 SX and 2 LX-Fiber Segments)	**$9,111.00**
BYP-0T-2S-2L-M	Tech Support and Advanced Exchange for Bypass Unit (2 SX and 2 LX-Fiber Segments)	**$911.00**
BYP-0T-4S-0L-P	External Bypass Unit for GX series appliances (4 SX-Fiber Segments)	**$7,333.00**
BYP-0T-4S-0L-M	Tech Support and Advanced Exchange for Bypass Unit (4 SX-Fiber Segments)	**$733.00**
DUAL-TVR-KIT-LX-ROHS	Dual LX-Fiber SFP mini-GBIC transceiver kit for GX series of appliances (ROHS Compliant)	**$675.00**
DUAL-TVR-KIT-SX-ROHS	Dual SX-Fiber SFP mini-GBIC transceiver kit for GX series of appliances(ROHS Compliant)	**$400.00**
DUAL-TVR-KIT-TX-ROHS	Dual TX-Copper SFP mini-GBIC transceiver kit for GX series of appliances (ROHS Compliant)	**$450.00**
GEFB1-1-H	Fiber Bypass Unit (1 segment) for G series of appliances For use with G1000F model	**$1,995.00**

Proventia® Network IPS/IDS Systems

Proventia IPS Bypass Units and Accessories

GEFB1-1-CS	Fiber Bypass Unit (1 segment) Maintenance for GEFB1-1-H For use with G1000F model	**$200.00**
GEFB2-1-H	Dual Fiber Bypass Unit (2 segment) for G series of appliances For use with G400F, G400CF, G2000F, and G2000CF models	**$3,990.00**
GEFB2-1-CS	Dual Fiber Bypass Unit (2 segment) Maintenance for GEFB2-1-H For use with G400F, G400CF, G2000F, and G2000CF models	**$400.00**

Notes:
1) First year of Technical Support (minimum of Standard level)/Advanced Exchange/Updates are required with purchase. See Tiered Support category for information regarding selection of Select or Premium service levels. These levels of support are subject to other conditions, and those conditions must be met before the order will be accepted
2) All systems must be ordered with one of the shipping options listed in the shipping section of the Price list.
3) Volume discounts are NOT available with the Proventia line of appliances.
4) Centralized Management is provided through the optional SiteProtector management system. See SiteProtector section for pricing and ordering information.
5) All systems come with 10/100/1000 Copper Ethernet management interface(s) in addition to the protected interfaces.
6) Some products may not be generally available. Please see the Product Pipeline on the ISS intranet for details on the availability of products.
7) External fiber bypass units ensure wire-speed pass-through in case of IPS failure. Without the bypass unit, network traffic will be blocked if power loss or if serious software or hardware failure occurs. Refer to the product datasheet to determine if an External Bypass Unit is needed to provide bypass functionality for a particular model.
8) License for operation of this device may not be transferred to new appliance at later date.
9) High Availability configurations for the Proventia appliances are ordered by purchasing a base unit and an HA unit plus associated maintenance fees.
10) All Appliance accessories can be viewed on the Proventia Appliance Accessory section of the Master Price List.
11) IPS Appliance licenses are available for use when converting a spare appliance to a production appliance. Please use the LICENSE ONLY ordering codes AND the standard maintenance ordering code. Full Maintenance is required to convert spare appliances to production units.

Notes:
1) The Proventia M product family includes firewall, VPN, basic routing and networking services, IPS, Virus Prevention, Anti Spam, and Web Filter for unlimited users up to the performance limitations of the appliance.
2) Maintenance, Technical support and advance exchange are bundled together and must be purchased every year. First year Maintenance, Technical support and advance exchange are required in addition to the license amount paid. Content Updates for IPS, AS, and WF as well as support for this platform are covered by the Maintenance, Technical support and advance exchange fee.
3) All systems must be ordered with one of the shipping options listed in the shipping category.
4) High Availability configurations for the Proventia appliances are ordered by purchasing a base unit and an HA unit plus associated maintenance fees. If the customer purchases Anti-Virus, only one subscription set per HA configuration (base + HA hardware) is required.
5) It is possible to manage the device directly with no additional hardware/software required. If more extensive management/reporting capabilities are required the optional SiteProtector management system must be

Proventia® Network Multi-Function Security

purchased. See SiteProtector section for pricing information.
6) The Antivirus subscription component includes (1)an annual subscription to antivirus security content updates for the selected number of users, and (2) the maintenance, content updates and technical support described in ISS Maintenance and Support Policy. Subscriptions are for a period of one year. *The number of users is equivalent to the number of IP's that are actively connecting through the appliance. AV license is limited to the maximum number of nodes per device.
7) The M10 may only have an AV license of 100, the M30 may only have an AV license of 500, and the M50 may only have an AV license of 2500. The MX platform offers AntiVirus on a per user basis.
8) Repair on spare hardware is billable on a time and material basis.
9) The availabilty of the M product families and the supporting products are subject to US Export Administration Regulation (EAR) rules as administered by the Department of Commerce, Bureau of Industry and Security (BIS). VPN speed is specifically restricted by these regulations. For more information, you can refer them to: http://www.bis.doc.gov/ and http://www.iss.net/export.

Proventia® Network Anomaly Detection System

Proventia Network Mail Security System

Proventia Network Mail - Bundles

Product Code	Descriptions	List Price:
MS3004-1000-P	Proventia Network Mail Suite - includes 1 appliance and license for up to 2499 users	**$20,300.00**
MS3004-1000-M	Tech Support, Advanced Exchange and Updates for MS3004-1000-P	**$4,466.00**
MS3004-2500-P	Proventia Network Mail Suite - includes 1 appliance and license for 2500-4999 users	**$25,450.00**
MS3004-2500-M	Tech Support, Advanced Exchange, and Updates for MS3004-2500-P	**$5,599.00**
MS3004-5000-P	Proventia Network Mail Suite - includes 1 appliance and license for 5000-7499 users	**$30,150.00**
MS3004-5000-M	Tech Support, Advanced Exchange, and Updates for MS3004-5000-P	**$6,633.00**
MS3004-7500-P	Proventia Network Mail Suite - includes 1 appliance and license for 7500-10000 users	**$35,750.00**
MS3004-7500-M	Tech Support, Advanced Exchange, and Updates for MS3004-7500-P	**$7,865.00**

Notes:
1) Product may not be Generally Available - please see Product matrix for information on expected release dates prior to accepting order
2) First year of Technical Support/Advanced Exchange/Updates is required with purchase.
3) All hardware systems must be ordered with one of the shipping options listed in the shipping category.
4) Centralized Management is provided through the optional SiteProtector management system. See SiteProtector section for pricing and ordering information.
5) See Tiered Support category for information regarding selection of Select or Premium service levels. These levels of support are subject to other conditions, and those conditions must be met before the order will be accepted
6) License for operation of this device may not be transferred to new appliance at later date.
7) All Appliance accessories can be viewed on the Proventia Appliance Accessory section of the Master Price List.
8) Proventia Network mail can be purchased in several ways.
A) Customer purchases the required number of boxes(listed in Appliance Only section) and licenses for the required number of users(as dictated by environment-designed for clustered environment). Maintenance is required on both components.
B)Customer purchases a Mail Suite bundle and appropriate maintenance. The customer may choose to purchase additional appliances and/or licenses using the stand-alone pricing listed and the appropriate maintenance for the add-on components.

Proventia® Management SiteProtector and Tools

Notes:
1) See Tiered Support category for information regarding selection of Select or Premium service levels. These levels of support are subject to other conditions, and those conditions must be met before the order will be accepted.
2) SiteProtector SecurityFusion is a security application that automates event correlation and response using built-in X-Force intelligence. It automatically correlates incoming attacks with vulnerability data (from Internet Scanner) to escalate likely-successful attacks and minimize attacks that have a low probability of success. This application adds automated correlation to the SiteProtector platform. The price of SecurityFusion is based on the total number of IP-based devices (assets) a customer wants to protect with SecurityFusion. SecurityFusion impact analysis component relies on data from at least one ISS vulnerability assessment product (Internet Scanner or System Scanner) and one IDS product (Proventia Appliance, or RealSecure sensors managed through SiteProtector). To get the full benefit of SecurityFusion, the customer must have at least one Intrusion Detection/Protection product and one vulnerability assessment product. Maintenance is required for SecurityFusion.
3) The Third Party Adapter should be packaged with services to add customized generic third-party product events into SiteProtector. this is used for the integration of PowertTech iSeries.
4) The Third Party Module collects Cisco PIX and CheckPoint Firewall-1 security events pricing based on the number of firewalls that will send data to SiteProtector
5) SiteProtector Management packages do not include any licenses for agents/sensors. Agents and Sensors must be purchased separately.
6) Some products may not be generally available. Please see the Product Pipeline on the ISS intranet for details on the availability of products.
7) SiteProtector SecureSync Integrated Failover System is ordered in quantity of 1. SecureSync enables a customer to the failover system for all SiteProtector instances they are licensed for. For Example, if a customer has 3 SiteProtector Sites, they need to purchase only 1 SecureSync, Integrated Failover System.

Tiered Support

Tiered Support and Maintenance

Product Code	Descriptions	List Price:
Standard	Technical Support, Maintenance, Software updates, and Advanced Exchange (for appliances) Notes: 1. Standard Support and Maintenance includes: · Access to product and technical experts via 24/7 telephone-based technical support · Product updates and enhancements · Security updates where available under licensing model Advanced exchange for Proventia appliances · Access to the True Blue Customer Portal (availability currently limited) · Online incident submission and tracking · Priority notification of new and emerging security threats · Unlimited access to the ISS Knowledgebase and X-Force Threat and Vulnerability Database · 4 Designated customer contacts (additional designated contacts may be purchased as an add-on service)	**See individual product listings for fees for Technical support and maintenance**
CS-DC-M	Additional Designated Contacts - Standard	**$1,000.00**
Select	Select Technical Support, Maintenance, Software updates, and Advanced Exchange (for appliances) Notes: 1. Customers must have the same level of support for all purchases. If customer wishes to upgrade to Select, contact Client Services for a quote on uplifting existing maintenance contracts to the new level of service. 2. Customers must meet a minimum annual license fee to qualify for uplift to Select services. If a customer's standard maintenance fee for all new and existing maintenance is $50,000 USD or above, they qualify for the program. Contact Client Services for more information. 3. Customers may not downgrade their level of support until their maintenance expiration date 4. Select Support and Maintenance includes: · Direct access to Senior Support Engineers via 24/7 telephone-based technical support · Product updates and enhancements · Security updates where available under licensing model Advanced exchange for Proventia appliances · Unlimited access to the ISS Knowledgebase and X-Force Threat and Vulnerability Database · 4 Designated customer contacts (additional designated contacts may be purchased as an add-on service) · Direct access to senior support engineers · Priority response to support incidents	**Standard Maintenance + 15% of total annual maintenance**
CS-DC-MSE	Additional Designated Contacts - Select	**$2,000.00**

Tiered Support

Tiered Support and Maintenance

Premium	Premium Technical Support, Maintenance, Software updates, and Advanced Exchange (for appliances)	
	Notes: 1. Customers must have the same level of support for all purchases. If customer wishes to upgrade to Premium, contact Client Services for a quote on uplifting existing maintenance contracts to the new level of service. 2. Customers must meet a minimum annual license fee to qualify for uplift to Premium services. If a customer's standard maintenance fee for all new and existing maintenance is $200,000 USD or above, they qualify for the program. Contact Client Services for more information. 3. Customers may not downgrade their level of support until their maintenance expiration date 5. Premium Support and Maintenance includes: Access to product and technical experts via 24/7 telephone-based technical support Product updates and enhancements (sold separately for Proventia products) Security updates (sold separately for Proventia products) Unlimited access to the ISS Knowledgebase and X-Force Threat and Vulnerability Database 6 Designated customer contacts (additional designated contacts may be purchased as an add-on service) Designated Premium Support Engineer (PSE) one contact for all support needs Highest priority response to support incidents Two onsite optimization reviews with PSE /year (additional onsite visits may be purchased as an add-on service) Bundled Consulting Services - up to $11,000/year (Min. 3-day engagement, Travel and Expenses not included) Bundled Education Services - up to $4,995/year 2 seats on the X-Force Threat Analysis service (additional seats may be purchased as an add-on service	**Premium pricing based on total license spend and annual maintenance levels. Contact isspricing@iss.net for quotes on this service.**
CS-DC-MPR	Additional Designated Contacts - Premium	**$4,000.00**
CS-TAM-MPR	Additional Onsite Visit - Premium	**Time and Materials**

Note :
Upgrade from Standard to Select Support or Premium Support - Customers whose current annual support fees for all ISS Products licensed exceed those set forth below may elect to upgrade from standard support by paying an initial uplift fee in accordance with the percentages below for all qualifying ISS-licensed products. The total annual support amount consists of support and subscription amounts paid annually for all licensed products. For so long as customer chooses to remain on Select Support or Premium Support, each new purchase or maintenance renewal quote and invoice will reflect the additional uplift. Select Support or Premium Support will only cover those products for which the uplift fee has been paid.

Standard to Select Support; qualifier - Greater than $50,000.00 USD in annual mtn - 15% uplift
Standard to Premium Support; qualifier - Greater than $200,000.00 USD in annual mtn - 35% uplift

FXXBRACKETS	Front & mid-mount rack kit for A201, A604, A1204, G100, G200, G1200 and M50	**$50.00**
GEFB2-1-CS	Dual Fiber Bypass Unit (2 segment) Maintenance for GEFB2-1-H	**$400.00**
PWS-1757000099	Advantech 40w Sinpro Power Brick w/40cm cable for M10/10e	**$75.00**

Notes:

1) For inline bypass functionality, customers must purchase optional external fiber bypass units with each G series appliance that has one or more fiber segments A single bypass unit must be purchased for every inline fiber segment or alternately a dual bypass unit for every two segments. For example, the G1000F needs a single bypass unit; the G1200CF needs two single bypass units or one dual and the G1200F needs four singles or two duals. Fiber G Series appliance may be sold without bypass units, however customers should understand that without the bypass unit, network traffic will be blocked in the case of a complete power loss or other serious hardware failure. ** Note: All G series appliances with copper monitoring ports already have integrated bypass functionality.

Security Event and Log Management Services

Product Code	Descriptions	List Price:

SELM-NET-STD-1YR — Security Event and Log Management - Network Class Devices - See Volume Table for Pricing — **$85.00**

The Security Event and Log Management offering is sold on a per network device, per server, and per host basis. The service is priced based on the number of devices, servers and hosts reporting into the Virtual-SOC Portal. To determine the unit price, compare the number of data sources against the volume discount table for each order the customer submits. — **Per Network Device, Per Month**

Host based pricing assumes all host data can be collected from a single server or collection point. If this is not the case, please contact product management for assistance.

The Security Event and Log Management offering requires the usage of an On-Site Aggregator for data collection or transmission. Please consult the service description for details on the number of OA devices required for each SELM implementation.

To determine the unit price, compare the number of data sources against the volume discount table for each order the customer submits.

Host based pricing assumes all host data can be collected from a single server or collection point. If this is not the case, please contact product management for assistance.

The Security Event and Log Management offering requires the usage of an On-Site Aggregator for data collection or transmission. Please consult the service description for details on the number of OA devices required for each SELM implementation.

Volume Level Pricing

Quantity		
250	250-500 Hosts	$0.64
501	501-5000 Hosts	$0.41
5001	5001-10000 Hosts	$0.32
10001	10001-25000 Hosts	$0.32
25001	25001-50000 Hosts	$0.30
50001	50001-75000 Hosts	$0.29
75001	75001-100000 Hosts	$0.27

SELM-OAMGT-1YR

Security Event and Log Management - Onsite Aggregator Management

$221.00

Per aggregator, Per Month

The Security Event and Log Management Service offering requires the usage of an On-Site Aggregator for data collection and transmission. Please consult the service description for details on the number of OA devices required for each SELM implementation.

3 Year	MGD-CSA-FW-3YR	$720.00

MSS-UVPN-SU

Firewall Management - Unmanaged Site-to-Site VPN One-Time Labor Fee

$1,495.00

Per Setup of Each Unmanaged VPN

One-time charge for the setup of a Managed to Unmanaged VPN. Applies to all network based firewall platforms.

An Unmanaged VPN is defined as any site-to-site VPN that terminates at a non-ISS managed device.

This SKU should be used for the setup of unmanaged VPNs during and following a device's deployment. The initial device configuration and deployment is covered under the standard setup SKU which does not include setup of unmanaged VPNs.

MGD-VPN-1YR

VPN Concentrator Management - Cisco, Select Platforms

$1,869.00

Per Month

Applies to Cisco VPN Concentrator platforms only.

SKU is for the service only. Platform, licensing, and maintenance are sold separately. Customer is required to maintain current maintenance/support for all platforms under management for the duration of the MSS contract.

SKU also includes:

- Full management of the VPN configuration and the platform on which it resides. (Management of the platform by the customer is not supported.)
- Unlimited Policy Changes per month.
- Support for Site VPNs.
- Support for Client VPNs.
- Customer is responsible for the creation of any user accounts required for client VPN access. If possible, ISS will integrate the VPN Concentrator with the client's external authentication server.

1 Year	MGD-VPN-1YR	$1,869.00
2 Year	MGD-VPN-2YR	$1,682.00
3 Year	MGD-VPN-3YR	$1,495.00

Managed Security Services

ISS Managed Security Services for Networks

MSS-WSB-1	Warm Standby Management - All Proventia Appliances Proventia Warm Standby Management is designed to provide customers the option of having ISS manage and keep up to date a single spare Proventia device such that in the event of a hardware failure with the customer's primary device, a hot, updated device will be on-hand to restore service more quickly. A standby device may not generate any traffic for the SOC unless it is placed into production. The warm standby management option is available for all Proventia model devices. SKU is for management of the standby platform only. Customer is required to maintain current maintenance/support for all standby platforms under management. SKU also includes: • Management and updating of the standby device • Transition of the standby device to production in the event the primary device were to fail.	**$375.00** **Per-Month**
MSS-OOB-SEN-US	Out-of-Band Device - US/Japan 110 VAC The Out-of-Band device is used for remote access to an ISS managed device in the event in-band connecivity is not operational. Up to four managed devices may be connected to a single out-of-band unit assuming those device are located in the same physical proximity as the OOB device. The OOB device is required when ISS is performing device management under the following services: • MPS for Network (Select and Premium) • Managed Firewall • Managed Intrusion Detection	**$855.00** **One OOB Per Each Four Mgd. Devices**
MSS-OOB-SEN-INT	Out-of-Band Device - International 230 VAC The Out-of-Band device is used for remote access to an ISS managed device in the event in-band connecivity is not operational. Up to four managed devices may be connected to a single out-of-band unit assuming those device are located in the same physical proximity as the OOB device. The OOB device is required when ISS is performing device management under the following services: • MPS for Network (Select and Premium) • Managed Firewall • Managed Intrusion Detection	**$1,155.00** **One OOB Per Each Four Mgd. Devices**

SKU is for the service only. Platform, licensing, and maintenance are sold separately. Customer is required to maintain current maintenance/support for all platforms under management for the duration of the MSS contract.

SKU also includes:
• Full management of the Desktop Protector application as stated in the service description.

1 Year	MGD-DT100K-1K-1YR	$389.00
2 Year	MGD-DT100K-1K-2YR	$350.00
3 Year	MGD-DT100K-1K-3YR	$311.00

MGD-DC1-1YR — Management of 1 Additional Desktop Controller / Agent Manager — **$475.00**

Provides for ISS management of an additional RealSecure Desktop Protector Desktop Controller. To be used in the event the customer's specific configuration requires more DC's than those included with the standard service fees. — **Per Month Per Each Additional DC**

Deployment of the Managed Desktop Service requires an MSS Statement of Work (SOW) and applicable setup fees. Setup consists of an onsite PSS engagement for the initial deployment of a desktop solution, or the takeover of an existing desktop deployment.

1 Year	MGD-DC1-1YR	$475.00
2 Year	MGD-DC1-2YR	$428.00
3 Year	MGD-DC1-3YR	$380.00

DT-POL-1 — Additional Managed Desktop Custom Policy — **$100.00**

For use with Managed Desktop Service only. This SKU should generally be used post sale, and allows for the implementation of an additional custom policy beyond those allotted for a standard deployment. — **Per Policy Per Month**

ISS Managed Protection Services for Networks

Product Code	Descriptions	List Price:
MPS-POL-1	Additional Policy for Multi-Policy Devices - MPS for Networks	**$100.00**
MPS-SMB-Packages	Standard Network [SMB] Service - Package Including Hardware - SEE BELOW FOR ORDERING CODES AND PRICES	**$0.00**

Packages include the MPS Service, all applicable setup fees, cost of the hardware, maintenance, and all content subscriptions with the exception of Antivirus for the duration of the MPS contract (currently available for 2 and 3 year subscriptions only) — **Per Month**

Customers who require an AV subscription must purchase this seperately using the standard ordering codes for the proper Proventia M platform. This limitation is in effect due to software royalties relating to the AV module.

Ownership of the hardware platform (asset) is transferred to the customer on day 1 of the contract.

MSS-UVPN-SU	Firewall Management - Unmanaged Site-to-Site VPN One-Time Labor Fee				**$1,495.00**
	One-time charge for the setup of a Managed to Unmanaged VPN. Applies to all network based firewall platforms. An Unmanaged VPN is defined as any site-to-site VPN that terminates at a non-ISS managed device. This SKU should be used for the setup of unmanaged VPNs during and following a device's deployment. The initial device configuration and deployment is covered under the standard setup SKU which does not include setup of unmanaged VPNs.				**Per Setup of Each Unmanaged VPN**

Managed Security Services

ISS Managed Protection Services for Networks

MSS-CVPN-SU	Firewall Management - Client VPN Enablement One-time charge for the enablement of Client VPN capabilities on a supported network based firewall platform. A Client VPN enablement consists of intial setup of the Managed Protection Agent's Client VPN capabilities. ISS will manage and control all rules and policy related to the Client VPN. For those platforms that allow (E.g. Checkpoint) the customer is required to perform all user administration for the Client VPN beyond the initial 5 users setup by ISS as part of the enablement process. For those platforms that do not allow for customer management of user administration (E.g. Proventia M), ISS will provide user management. This SKU should be used for the setup of client VPNs during and following a device's deployment. The initial device configuration and deployment is covered under the standard setup SKU which does not include setup of client VPNs.	**$695.00** **Per Enablement on Each Managed Device**
MSS-WSB-1	Warm Standby Management - All Proventia Appliances Proventia Warm Standby Management is designed to provide customers the option of having ISS manage and keep up to date a single spare Proventia device such that in the event of a hardware failure with the customer's primary device, a hot, updated device will be on-hand to restore service more quickly. A standby device may not generate any traffic for the SOC unless it is placed into production. The warm standby management option is available for all Proventia model devices. SKU is for management of the standby platform only. Customer is required to maintain current maintenance/support for all standby platforms under management. SKU also includes: • Management and updating of the standby device • Transition of the standby device to production in the event the primary device were to fail.	**$375.00** **Per-Month**
MSS-OOB-SEN-US	Out-of-Band Device - US/Japan 110 VAC The Out-of-Band device is used for remote access to an ISS managed device in the event in-band connecivity is not operational. Up to four managed devices may be connected to a single out-of-band unit assuming those device are located in the same physical proximity as the OOB device. The OOB device is required when ISS is performing device management under the following services: • MPS for Network (Select and Premium) • Managed Firewall • Managed Intrusion Detection	**$855.00** **One OOB Per Each Four Mgd. Devices**
MSS-OOB-SEN-INT	Out-of-Band Device - International 230 VAC The Out-of-Band device is used for remote access to an ISS managed device in the event in-band connecivity is not operational. Up to four managed devices may be connected to a single out-of-band unit assuming those device are located in the same physical proximity as the OOB device. The OOB device is required when ISS is performing device management under the following services: • MPS for Network (Select and Premium) • Managed Firewall • Managed Intrusion Detection	**$1,155.00** **One OOB Per Each Four Mgd. Devices**
DP-MSS1DAY-S	Daily rate for on-site deployment of a single MSS/MPS service [Does not include T/E]	**$2,295.00** **Per Device, Per Day**

Managed Security Services

ISS Managed Protection Services for Networks

MSS-CPE-L1-RD	Level 1 Re-deployment: Use for Standard Level MFS, IDS/IPS and MPS platform re-deployments.	**$595.00**
	Redeployment fees are to be used POST DEPLOYMENT. These fees are charged to customers who elect to change their managed security platform mid-contract. In the event the platform change requires support from ISS' deployment team, the customer will be assessed the appropriate redeployment fee based on service level and device type.	**Per Device**
MSS-CPE-L1HA-RD	Level 1 HA Re-deployment: Use for Standard Level MFS, IDS/IPS and MPS High-Availability platform re-deployments.	**$795.00**

Product Code	Descriptions	List Price:
AS-APPL-S	PSS - Application Security Assessment	**$275.00**
	The Internet Security Systems (ISS) Application Security Assessment enables an organization to balance time-to-market demands with security best practices. The Application Security Assessment uses a five-step method to provide a comprehensive security review of custom or off-the-shelf applications without the time-consuming process of conducting a complete code review.	**Min 5 days** **Custom Scope**
	Objectives of an Application Security Assessment include:	**Remote assessment only.**
	-Identification of application vulnerabilities -Demonstration of an application attack—without the risk -Analysis and documentation of specific business risks -Validation of existing security safeguards, policies and procedures -Education of security and IT staff on the latest application exploitation techniques	

< 4 weeks	$275.00
5 - 8 weeks	$270.00
9 - 12 weeks	$265.00
13-16 weeks	$255.00
17 - 20 weeks	$245.00
21 - 24 weeks	$235.00
25+ weeks	$220.00

AS-EVULN-S	PSS - External Vulnerability Assessment	
	The ISS External Vulnerability Assessment is a comprehensive vulnerability network assessment designed to identify and document all vulnerabilities present on external network segments. ISS conducts this assessment from a remote location to simulate the viewpoint of an external attacker (from the Internet). The results are gathered, correlated and verified by ISS security consultants to ensure the accuracy of the results. The results are provided in a custom deliverable, complete with risk ratings and mitigation strategies.	**$ 5,000 - $15,000** **Pricing may vary depending on scope**
	Note: The ISS External Vulnerability Assessment does not include active exploitation of vulnerabilities.	
AS-IFSA-S	PSS - Information Security Assessment	**$275.00**
	Internet Security Systems' Information Security Assessment provides a comprehensive evaluation of the organization's information security policies, procedures, controls and mechanisms, as well as its networks, servers, desktops and databases. ISS information security consultants then analyze and document tactical recommendations and hold a two-day interactive, strategic project-planning workshop that provides an actionable plan to achieve and maintain on-going security goals. Specialized analysis is available for GLB, HIPPA and others.	**Min 3 days** **Custom Scope**
	-Security Architecture Review -External Vulnerability Assessment -Internal Vulnerability Assessment -Security Controls and Mechanisms Review -Threat Profiling -ISO 17799 Gap Analysis -Collaborative Review of Analysis -Custom Deliverable Preparation -2-Day Security Strategy Workshop -Charter Document -Project Plan

AS-PCINS-S

PSS - PCI Quarterly Network Scan.

$2,250.00

NEW OFFERING The new Payment Card Industry (PCI) data security standards are network security and business practice guidelines developed by Visa, MasterCard, American Express, and Discover Card.

Included a scan of up to 40 Ips

ISS is a qualified independent scan vendor available to assess PCI Merchants and Service Providers Levels 1-4 in detecting security vulnerabilities within their network.

ISS recommends purchasing network scans on a yearly basis to ensure compliance with PCI standards

Included a scan of up to 40 IPs - $20 USD for each additional IP over 40

AS-PDSA-S

Annual On-Site PCI Data Security Assessment

Assessment provides:

Depending upon scope price range is $4,000 - $15,000

•A comprehensive evaluation of your organization's information security with regard to networks, servers, and databases involved in the transmission, storage, and processing of credit card data.

•A comprehensive evaluation of your organization's information security policies, processes, and infrastructure with regard to networks, servers, and databases involved in the transmission, storage, and processing of credit card data.

•Specific recommendations to pass the Annual On-Site Security Audit.
•Analysis and documentation by ISS information security consultants of strategic and tactical recommendations based upon the globally recognized VISA CISP requirements and industry best practices.
Final Visa CISP Deliverable as well as PCI compliance letter to satisfy MasterCard, American Express and Discover Card

AS-XFIE-S

PSS - Penetration Test

$15,000.00

The Penetration Test is a network attack simulation in which elite security consultants attempt to break into the client's network mimicking the techniques used by underground hackers. During the Full Perimeter Penetration Test, ISS, from a remote location, will examine and attempt to exploit key areas of the network infrastructure from the perspective of an attacker located on the Internet. Once the perimeter is compromised, ISS will determine what assetts we can find on the network.

Scope:
Price Includes:
5 active IP's
Each additional IP is $800

Managed Security Services

Professional Security Services

AS-XSTP-S

PSS - Security Certification Program

$67,500.00

The Security Certification Program offers an organization the opportunity to receive documented validation of its security "due diligence" via a letter of acceptance and a Web icon granted by an independent, qualified third party – ISS. In order to become qualified for the Security Certification Program, the customer's security controls and practices must meet or exceed ISS' best practices security criteria, based upon the ISO 17799 standard.

ISS performs the following tests to evaluate and verify that best practices are in place:

-External Perimeter Penetration Test with remote exploitation
-Security Architecture review
-Internal Vulnerability analysis
-Policy and procedure review
-Security Controls and Mechanisms
-Quarterly Perimeter Penetration tests
-Monthly Perimeter Vulnerability Scans

Scope:
Full Perimeter Pen Test
Up to maximum of 2 Class C networks (512 IPs), up to 25 active IPs to be targeted, target will include devices on perimeter, in DMZ or "extranet", and accessible internal devices
Internal Assessment
1 location,
up to 250 hosts,
up to 2 Databases,
1 Firewall ruleset
Quarterly Light Perimeter Pen Tests
Up to max of 2 Class C networks (512 IPs), up to 25 active IPs to be targeted. Targets will include devices on perimeter only.
Monthly Perimeter Vulnerability Scans
Up to max of 2 Class C networks (512 IPs), up to 25 active IPs to be targeted. Targets will include devices on perimeter only.

*Pricing will vary depending on scope.

PSS- Jumpstart for Internet Scanner

$9,000.00

SS' JumpStart Service provides rapid, cost-effective security optimization and protection with minimal impact on normal staff operations. ISS deploys the protection solution technology as well as customizes and integrates the solution for an organization's unique environment. In addition, your staff has the opportunity to learn about the new systems first-hand as they are being deployed

The scope of this project includes:

-Installation of the SiteProtector management environment in a distributed configuration.
-Installation of the Internet Scanner systems to provide the best overall assessment options.
-Creation of custom scans policies based on the unique customer environment.
Demonstration of all installation and configuration steps to key personnel for knowledge transfer purposes.

Professional Security Services

DP-JPPD-S	PSS - Jumpstart for Proventia Desktop	**$9,000.00**

ISS' JumpStart Service provides rapid, cost-effective security optimization and protection with minimal impact on normal staff operations. ISS deploys the protection solution technology as well as customizes and integrates the solution for an organization's unique environment. In addition, your staff has the opportunity to learn about the new systems first-hand as they are being deployed

The scope of this project includes:

-Installation of the SiteProtector management environment in a distributed configuration.
-Creation of Desktop agent builds based on specific groups and policies.
-Deployment of a pilot group of all agent builds to a pre-defined sampling of desktops (up to 10% of all agents).
-Review of initial alerts, bandwidth, etc.
-Tuning of sensor policies to meet customer's business requirements, and eliminate false positives.
-Determine best possible option for full deployment of remaining agents (e-mail, web server, electronic software distribution, etc)
Demonstration of all installation and configuration steps to key personnel for knowledge transfer purposes.

DP-JPPG-S	PSS - Jumpstart for Proventia G Intrusion Prevention Appliances	**$9,000.00**

ISS' JumpStart Service provides rapid, cost-effective security optimization and protection with minimal impact on normal staff operations. ISS deploys the protection solution technology as well as customizes and integrates the solution for an organization's unique environment. In addition, your staff has the opportunity to learn about the new systems first-hand as they are being deployed

The scope of this project includes:

-Installation of the SiteProtector management environment in a distributed configuration.
-Installation of the Proventia G systems to provide the best overall protection for the different network segments.
-Creation of custom sensor policies based on the unique customer environment.
Demonstration of all installation and configuration steps to key personnel for knowledge transfer purposes.

DP-JPADS-S	PSS - JumpStart: Anomaly Detection Server	**$9,000.00**

ISS' JumpStart Service provides rapid, cost-effective security optimization and protection with minimal impact on normal staff operations. ISS deploys the protection solution technology as well as customizes and integrates the solution for an organization's unique environment. In addition, your staff has the opportunity to learn about the new systems first-hand as they are being deployed

The scope of this project includes:
Assessment of appropriate deployment architecture
Deployment of Proventia Network ADS Collectors and Analyzer including SiteProtector
Initial configuration of Flow Information or Span/Tap's
Configure initial policy and setup notifications
Creation of custom rules to meet customer's business requirements
oCompliance
oAcceptable Use Policy Monitoring
oNetwork Change Detection
oNetwork Segmentation & Hardening
Demonstration of key elements of the system
oTraffic visibility and forensics searching
oHandling of alerting within the system
oCreation & Customization within Reporting
Demonstration of all installation and configuration steps to key personnel for knowledge transfer purposes.

MG-CFALB-S

PSS – Computer Forensics, Analysis and Litigation Service Basic Package

$9,540.00

ISS Computer Forensics Services analyze digital evidence and report all findings back to the customer. Analysis can include post-intrusion analysis, employee activity analysis, email forensics, web browsing habits, work timelines and other types of incidents. In this area we can also provide advice and support to legal counsel, both internal and external, regarding any forensic findings and electronic evidence.

This service leverages the forensics expertise of an elite group of ISS consultants. These consultants will insure that any evidence found will preserved in a manner that can be used in court. In addition, they are available to testify as expert witnesses on behalf of our customers.

* NOTE: This service includes Computer Forensic Analysis and/or Basic Evidence Acquisition. A separate service order form may be required in relation to the number of digital items to be forensically acquired.

The following are included in this service:

* Teleconference kick-off and service preparation

* Two (2) hours per month of Business Hours Telephone Support

* Two (2) Emergency Incident Declarations per year (Each additional is $1,500)

* Twenty Four (24) Staff Hours per year (On-site or Remote)

* Assigned Account Manager

* Discounted Staff Hourly rate of $250.00 per hour after the initial 24

MG-ERIR-S

PSS - Ad-Hoc Emergency Response Services - Incident Response

$330.00

Per Hour

ISS provides the client with specialized technical assistance and advice in handling an Incident. Assistance and advice will be provided in the following phases of incident management and response:

• Analysis: analysis of Incident data to determine the source of the Incident, its cause (program error, human error, or deliberate action), and its effects;
• Containment: preventing the effects of the Incident from spreading to other computer systems and computer networks in your organization;
• Eradication: stopping the Incident at the source and/or protecting your computer systems and computer networks from the effects of the Incident;
• Recovery: restoration of the affected computer systems and computer networks to normal operation; and
• Prevention: making sure that your computer systems and computer networks are protected from future occurrences of the Incident

Staff Hours
*On-site Response
ISS includes UP to 48 man-hours (More than 48 hours will be charged at $330 per hour) for Emergency Incident Management, Forensics Analysis and/or Basic Evidence Acquisition.

*Remote Response
ISS includes UP to 24 man-hours (More than 24 hours will be charged at $330 per hour) for Emergency Incident Management, Forensics Analysis and/or Basic Evidence Acquisition.

MG-FRNS-S

PSS - Ad-Hoc Emergency Response Services - Forensics

$300.00

Per Hour

ISS will collect, verify, store, preserve, and maintain a proper chain of custody for any electronic evidence--in a court approved manner--required by the client. We have the ability to quickly and effectively collect and preserve a single system, up thru thousands of systems in disparate locations. We can also collect evidence from live systems, minimizing or avoiding downtime on client's critical systems.

This service leverages the forensics expertise of an elite group of ISS consultants. These consultants will insure that any evidence found will preserved in a manner that can be used in court. In addition, they are available to testify as expert witnesses on behalf of our customers.

This service price does NOT include the evidence storage media for the original evidence or any additional forensic copies (duplicates). These items will be at the expense of the customer. There is an 8 hour minimum per physical location.

The course must be taken in consecutive days within the week by the same student	**$4,750.00**
TR-FastTrack-CL	ISS FastTrack Program FastTrack combines an Introductory and Advanced Course at a discount price. Fast Track will appear in the name and course description of the course. The course must be taken consecutively within the same week by the same student.	**$4,750.00**
TR-EH-CL	Education - Network Intrusion & Penetration Techniques Class The Network Intrusion & Penetration Techniques course provides a structured methodology for detailing the practices hackers use to assess and attack corporate networks. The course employs a network laboratory that simulates a corporate Internet site, enabling practical demonstration of assessment techniques and security exploits that can critically damage an organization's IT infrastructure. This course provides valuable insight into how hackers circumvent and defeat security controls in networked environments, applications and operating systems – even within a seemingly secure environment. • This course must be taken within 6 months of registration	**$3,800.00**
TR-AID-CL2	Education - Intrusion Detection and Response Class The course provides insight into hacker techniques as well as hands-on practice of advanced intrusion detection methods and incident response strategies necessary to protect your critical assets. It will empower you to develop potent policies, procedures and architectures that will protect your networks from exploits. Plus it will equip you to to analyze and locate the modifications an intruder has made to your systems. After completing the course, you will have better knowledge of the tools and framework necessary to ensure that your business continues as efficiently as possible with the shortest recovery time.	**$2,595.00**
TR-AIDFQX-CL	Education - Intrusion Detection and Forensics Workshop Fast Track By combining Advanced Intrusion Detection and Forensics, students will be able to develop potent policies, procedures and network architectures that thwart exploits. In addition, they will be equipped to analyze and locate the modifications an intruder has made to an organizations system and properly preserve the data for legal purposes.	**$3,750.00**
TR-FOR-CL	Education - Forensics Workshop The Forensics course will provide students with the ability to understand, locate, organize and properly preserve the physical and electronic evidence associated with a cyber crime. This course enables students to use popular toolkits to conduct a forensic examination on Windows-based and Unix-based systems. Finally students will be able to properly document and report their findings.	**$1,995.00**
TR-Onsite-CL	Education -Onsite Training for up to 16 students at the customer location - Prices shown are per day Note: Onsite lab rental and instructor travel expenses will be charged to the customer. Prices shown are per day.
